

PATTINAWA

11358

PROJECT 11358 * PATINA

Patina restaurant is housed within Frank Gehry's extraordinary stainless steel clad building, the internationally acclaimed Walt Disney Concert Hall in downtown Los Angeles. The most striking elements are the walls sheathed in walnut panels, sculpted to mimic rigid curtains and the ceiling's voluptuous curves and swoops that include a series of linear recessed bands, highlighted by striking luminous golden cold cathode lamps to complete this contemporary yet sensual design.

Architect Hagy Belzberg has created a stunning dining space that projects it's own individuality while complementing the design qualities of the concert hall.

PROJECT CREDITS :

project: patina restaurant / walt disney concert hall

location: los angeles california

architect: hagy belzberg A.I.A.

photography: tom bonner

* cold cathode lighting system:

B-200 high lumen ballast system
